

Maths Skills Development Work Group B

Delivered in partnership with London Central and West Maths Hub

The Programme

This programme aims to develop teachers' and TA's subject knowledge in the core maths topics. Participants will collaborate with colleagues from other schools to co-plan lessons and share resources. The work group will generate a cycle of continuous improvement by blending subject knowledge workshops with inter-session tasks and in-school support that will help and support teachers to embed the ideas from the workshops. The work group will span several months.

Includes:

- 5 half – day workshops with intersession tasks, led by maths specialists
- Half – day in-school bespoke support
- Core topics include number sense, fractions, percentages and geometry

Who is the programme for?

Upper KS2 teachers and TAs and non-subject specialists teaching KS3 with fragile subject knowledge who are likely to lack confidence in their mathematical ability and require support. Participants should be receptive to change and have the desire to improve their practice in order to help children develop a deep understanding of the subject.

Outcomes

1. Deeper subject knowledge and conceptual understanding
2. Enhanced motivation and engagement in Maths
3. Inspiration for activities and resources

What others have said about Lampton Maths CPD

“awesome course that builds confidence”
“good range of strategies; some I didn't even think of!”
“lots of ideas to try straight away in class”

Your commitment

- Attend every workshop session
- Complete the pre and post course surveys and provide data as required
- Engage in intersession tasks between sessions
- Engage in resource and activity development between sessions with other colleagues

- Be open and reflective about your own maths understanding and teaching through increased self-awareness and peer observations

Our commitment

- to provide high quality facilitated training
- to provide support between sessions

Delivery centre

Fox Primary School,
Kensington Place, London, W8 7PP
